

CPCCCA2002: Use carpentry tools and equipment

ASSESSMENT WORKBOOK (STUDENT VERSION)

RTO CODE:46296 | CRICOS CODE: 04304G | LEVEL 3, 65 BROUGHAM STREET GEELONG VIC

CPCCCA2002 Use carpentry tools and equipment

Assessment information

STUDENT TOOLBOX

Additional information to support you in completing training and assessment for units of competency from the Construction, Plumbing and Services Training Package is provided in the Student Toolbox. If you haven't read through the Toolbox lately, take a few moments to review it now.

ASSESSMENT DETAILS

This unit of competency specifies the skills and knowledge required to select and safely use and maintain carpentry tools and equipment, meeting all relevant requirements of national construction codes, Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

Assessment for this unit comprises:

- ▶ a knowledge test
- ▶ assessor observation of practical tasks
- ▶ collection of evidence to demonstrate knowledge and skills in:
 - planning and preparation
 - risk management
 - fault reporting
 - storing and securing tools and equipment
 - cleaning up.

Assessor checklists and an Evidence Collection template are provided in this Workbook. Review these documents before you get started so you are clear on what you need to do. Speak to your trainer, assessor or workplace supervisor if you have questions.

CO-ASSESSMENT INFORMATION

In some cases, this unit will be assessed alongside other units from the Construction, Plumbing and Services Training Package. Your assessor will advise you if co-assessment is right for you and will talk to you about how this will take place. Keep in mind that, regardless of how and when assessment takes place, the skills and knowledge you are required to demonstrate for this unit don't change.

**AM I READY?**

Use this section to check that you are ready to proceed with assessment. You should also use it to record important dates.

Prerequisites

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCCWHS1001 Prepare to work safely in the construction industry meets this requirement.

Evidence of completion of this requirement has been provided:

☐ Yes ☐ No

See page: _____ of my Student Toolbox

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry is a prerequisite unit.

Evidence of completion of this requirement has been provided:

☐ Yes ☐ No

See page: _____ of my Student Toolbox

Assessment checkpoint

I have completed an assessment checkpoint for this unit and I feel ready to undertake assessment for this unit.

☐ Yes ☐ No

Student assessment agreement

I have completed and submitted a Student Assessment Agreement for this unit of competency.

☐ Yes ☐ No

Important dates

Important dates for assessment are:

Assessor observation _____

Submission of evidence collection template _____

TASK REQUIREMENTS

Knowledge test

In this task, you will answer a range of questions relating to the safe and effective use of carpentry tools and equipment. This is an open book test that can be completed in the classroom or set as a homework activity.

You will need to correctly complete all requirements of the knowledge test to be marked as satisfactory for this task.

You should submit your completed Knowledge test and wait for approval before commencing the practical components of your assessment. This will help to ensure that you have demonstrated that you have the required knowledge to proceed.

Practical observation

For this unit, you are required to demonstrate the safe and effective maintenance and use of a range of tools and equipment during the performance of three different carpentry tasks. You will find a list of the tools and equipment in the checklist provided below.

During the three tasks, you are also required to:

- ▶ replace blades/cutters/grinding discs in a power saw, a powered planer, a router and a grinder
- ▶ grind, sharpen and hone a hand plane blade
- ▶ grind, sharpen and hone a chisel.

Your assessor will observe you working with each of the tools and will complete an assessor observation checklist.

You may like to use your copy of the checklist to keep track of the tools that you have used. Note that you are not required to use every tool for every task. Rather, you must use every tool at least once and you must complete three different tasks.

Your assessor will provide you with the plans, work instructions and materials required for the three tasks.

Evidence collection

You are also required to complete an Evidence collection template for this unit. This template requires you to reflect on the different components of the tasks that you undertook, the safety requirements that you considered, the planning and preparation that you undertook, risk management, your decision-making and clean up. The template provides questions, suggestions for suitable evidence and space for your supervisor to add their comments.

When completing your Evidence collection template, add as much information as you can about what you did, why you did it and how you did it. Don't forget to ask your supervisor to add their comments and to sign the document.

You must successfully complete all parts of the practical tasks to be marked as satisfactory for this component of your assessment.

KNOWLEDGE TEST – CPCCCA2002 USE CARPENTRY TOOLS AND EQUIPMENT

Answer each of the questions below. You need to answer all questions correctly to receive a satisfactory outcome for this task.

1. List at least three workplace policies and/or procedures that you will rely on to help guide you to use tools and equipment safely and effectively during your carpentry career.

2. Describe how Australian Standards could be relevant to your use of carpentry tools and equipment.

3. List at least three sources of information that you could use to find information about how to use a new tool or piece of information safely.

4. List at least five safety considerations when working with electrical tools and equipment.

5. In this table, you will find a list of things that you can do to contribute to your own safety and the safety of others while using tools and equipment.
Complete the table by providing two reasons why each of these things is important.

Safety practice	Two reasons why this practice is important
Following safety procedures when performing work tasks	1.
	2.
Following safety procedures when using tools and equipment	1.

	2.
Identifying and reporting hazards, incidents and injuries	1.
	2.
Keeping the work area clean, tidy and free from debris	1.
	2.
Not using or being affected by drugs and/or alcohol while at work	1.

	2.
Selecting and using required PPE	1.
	2.
Removing waste and debris to designated areas	1.
	2.
6. PPE is required on all construction worksites. It provides some protection where other risk controls have failed. Describe the purpose of each of the following types of PPE when using tools and equipment.	

Safety footwear	
Respiratory protection	
UV protective clothing	
Sunscreen	
Eye protection	
Hearing protection	

Hard hat

7. List four ways that you can find out what PPE you need for a particular work site or job task.

Imagine that you had been asked to introduce a new apprentice to the tools and equipment in your workplace. Work through the following list and give a very brief summary of each of the following (you only need to write a few words for each). Explain:

- ▶ *What each tool is used for*
- ▶ *Give one tip for how it can be checked for serviceability*
- ▶ *Give two tips for how it should be used (think about safety, quality and efficiency)*

Tool/equipment	What is it used for?	Serviceability	How is it used?
Hand tools			
8. Retractable tape measure			
9. Folding or steel ruler			
10. Combination square			

11. String line			
12. Chalk line			
13. Hand saw			
14. Coping saw			
15. Carpenters hammer / claw hammer			
16. Wood chisel			

17. Hand plane			
18. Trimming knife			
19. Clamps			
Power/battery/pneumatic tools and equipment			
20. Circular saw			
21. Reciprocating saw			

22. Sliding compound saw			
23. Jigsaw			
24. Angle grinder			
25. Planer			
26. Laminate trimmer or router			
27. Drill			

28. Rotary hammer drill			
29. Impact driver			
30. Nail gun			
31. Bench grinder			
32. Extension lead			
33. Portable residual current device			

34. Air compressor and hoses.			
35. Describe the process that you would use to sharpen the blade of a hand plane. Include in your answer two tips for how you would ensure that you work safely.			
Process		Tips for working safely	
		1.	
		2.	
36. Describe the process that you would use to sharpen the blade of a chisel. Include in your answer two tips for how you would ensure that you work safely.			
Process		Tips for working safely	
		1.	

	2.

PREPARATION AND PLANNING

If you are being assessed for this unit in conjunction with another unit, you may have already completed the preparation and planning for your three carpentry tasks. Record those details in this table. You will not need to complete the Preparation and Planning section of the *Evidence Collection Template* for this unit.

If you are being assessed for this unit on its own, you will need to complete all sections of the *Evidence Collection Template* for this unit.

The three carpentry tasks that I demonstrated the safe and effective use and maintenance of tools and equipment are:

Task 1:

- ☐ I have already prepared and planned for this task. This is documented in unit: _____
- ☐ My planning and preparation for this task is documented in the *Evidence Collection Template* for this unit below.

Task 2:

- ☐ I have already prepared and planned for this task. This is documented in unit: _____
- ☐ My planning and preparation for this task is documented in the *Evidence Collection Template* for this unit below.

Task 3:

- ☐ I have already prepared and planned for this task. This is documented in unit: _____
- ☐ My planning and preparation for this task is documented in the *Evidence Collection Template* for this unit below.

ASSESSOR OBSERVATION CHECKLIST – CPCCCA2002 USE CARPENTRY TOOLS AND EQUIPMENT

Student name:

Tasks observed

Briefly describe each of the tasks observed by your assessor.

Task 1

Task 2

Task 3

In this unit, you are required to report any faults that you find in tools and equipment. It may be that a fault won't be identified. If you do not have the opportunity to demonstrate this skill during the course of the observation, your assessor will find a tool and ask you to show them the process you would follow if a fault had been identified.

Reporting faults with tools and equipment

Indicate in which task you observed the student identify and report faults or issues with tools and equipment. If you observed the student do this across more than one task, you should identify which task your comments relate to.

Activity	Task 1	Task 2	Task 3	Comment	Initials
▶ Report faults or issues with tools and equipment as part of serviceability checks?					

Inspect work site

Activity	Task 1	Task 2	Task 3	Comment	Initials
Check site for hazards and take appropriate corrective actions?					
Locate site services?					
Set up barricades and signage?					

Hand tools

Indicate which task you observed use of each tool in. Ensure the student selected and used correct PPE, assessed hazards and applied risk controls, selected the right tool for the job, checked for serviceability, used the tool correctly and followed WHS and manufacturer recommendations

Tool	Task 1	Task 2	Task 3	Comment	Initials
Retractable tape measure					

Folding or steel ruler					
Combination square					
String line					
Chalk line					
Hand saw					
Trimming knife					
Clamps					
Bevels					
Spirit level					
Tin snips					
Power/battery/pneumatic tools and equipment					
Indicate which task you observed use of each tool in. Ensure student selected and used correct PPE, assessed hazards and applied risk controls, selected the right tool for the job, checked for serviceability, used the tool correctly and followed WHS and manufacturer recommendations.					
Tool	Task 1	Task 2	Task 3	Comment	Initials
Circular saw					
Reciprocating saw					
Sliding compound saw					

Jigsaw					
Angle grinder					
Planer					
Laminate trimmer or router					
Drill					
Rotary hammer drill					
Impact driver					
Nail gun					
Equipment					
Indicate which task you observed. Ensure the student selected and used correct PPE, assessed hazards and applied risk controls, selected the right tool for the job, checked for serviceability, used the tool correctly and followed WHS and manufacturer recommendations.					
Tool	Task 1	Task 2	Task 3	Comment	Initials
Bench grinder					
Extension lead					
Portable residual current device					
Air compressor and hoses					

Maintenance tasks					
Indicate which task you observed use of each tool in. Ensure that the student selected and used correct PPE, assessed hazards and applied risk controls, selected the right tool for the job, checked for serviceability, used the tool correctly and followed WHS and manufacturer recommendations.					
Tool	Task 1	Task 2	Task 3	Comment	Initials
Replace blades/cutters/grinding discs in:					
▶ a power saw					
▶ a powered planer					
▶ a router					
▶ a grinder					
Grind, sharpen and hone a hand plane blade.					
Grind, sharpen and hone a chisel.					
Clean up work area/site					
Observe the student as they clean up after each carpentry task. Students must complete the below after each task. Identify which task your comments relate to.					
Activity	Task 1	Task 2	Task 3	Comment	Initials
Clean the work area safely and effectively, following materials handling, WHS and waste disposal requirements.					
Check and maintain tools and equipment?					

Store and secure tools and equipment.					
Assessment outcome – CPCCCA2002 Use carpentry tools and equipment: Observation ☐ Satisfactory ☐ Not satisfactory					
Assessor signature:					
Assessor name:					
Date:					

EVIDENCE COLLECTION TEMPLATE – CPCCCA2002 USE CARPENTRY TOOLS AND EQUIPMENT

Part 1 – Preparation and planning

Describe the activities which you undertook to prepare and plan for each of the three carpentry tasks that this assessment is based on. Don't forget that, if you are being assessed for this unit in conjunction with another unit, you may have already completed the preparation and planning for your three carpentry tasks. In this case, you will not need to complete Part 1 of this template. Speak to your assessor or supervisor if you are unsure.

Task 1			
Activity	Your comments/describe what you did	Suitable evidence	Supervisor's initials
Reviewing work instructions			
<i>Summarise the information that you got from the work instructions, plans and specifications for this task.</i>		 Work instructions Photographs Your notes/plans	
<i>What did the work instructions, plans and specifications for this task tell you about the tools and equipment that you would require for this task?</i>			

<i>How did you use the work instructions, plans and specifications to help you use tools and equipment for this task?</i>			
I have attached the following as evidence of this activity:			
Planning			
<i>Describe the planning which you did to ensure that you complied with legislation, national construction codes, Australian Standards and workplace requirements.</i>		 Policies Procedures Work plans Work instructions Photographs	
<i>List at least three sources of information that you used to source information about your requirements in these areas.</i>			
<i>Describe one Australian Standard that you complied with when doing your planning.</i>			
<i>Describe the planning which you did to ensure that you</i>			

<i>worked safely and complied with WHS standards.</i>			
<i>Describe the planning which you did to ensure that you met environmental requirements.</i>			
<i>Describe the planning that you did to meet workplace requirements.</i>			
I have attached the following as evidence of this activity:			
Personal protective equipment (PPE)			
<i>Describe the process that you to select PPE for this task.</i>		 Work instructions Photographs Videos Supervisor endorsement Policies and procedures	
<i>What PPE did you select for this task?</i>			
<i>What changes did you need to make to PPE depending on the tools or equipment that you were using?</i>			
<i>How did you ensure that your PPE was fitted properly?</i>			

<i>How did you ensure that your PPE was suitable for the task?</i>			
I have attached the following as evidence of this activity:			
Inspecting the work site			
<i>Describe the process that you used to inspect the work site.</i>		 Risk assessment Photographs Videos Site plan Documentation in relation to services	
<i>How did you locate services?</i>			
<i>What hazards did you identify and how did you address them?</i>			
<i>What risk controls did you put in place? Did you require signage and barricades?</i>			
I have attached the following as evidence of this activity:			

Task 2			
Activity	Your comments/describe what you did	Suitable evidence	Supervisor's initials
Reviewing work instructions			
<i>Summarise the information that you got from the work instructions, plans and specifications for this task.</i>		 Work instructions Photographs Your notes/plans	
<i>What did the work instructions, plans and specifications for this task tell you about the tools and equipment that you would require for this task?</i>			
<i>How did you use the work instructions, plans and specifications to help you use tools and equipment for this task?</i>			
I have attached the following as evidence of this activity:			

Planning			
Describe the planning which you did to ensure that you complied with legislation, national construction codes, Australian Standards and workplace requirements.		 - Policies - Procedures - Work plans - Work instructions - Photographs	
List at least three sources of information that you used to source information about your requirements in these areas.			
Describe one Australian Standard that you complied with when doing your planning.			
Describe the planning which you did to ensure that you worked safely and complied with WHS standards.			
Describe the planning which you did to ensure that you met environmental requirements.			

<i>Describe the planning that you did to meet workplace requirements.</i>			
I have attached the following as evidence of this activity:			
Personal protective equipment (PPE)			
<i>Describe the process that you to select PPE for this task.</i>		 Work instructions Photographs Videos Supervisor endorsement Policies and procedures	
<i>What PPE did you select for this task?</i>			
<i>What changes did you need to make to PPE depending on the tools or equipment that you were using?</i>			
<i>How did you ensure that your PPE was fitted properly?</i>			
<i>How did you ensure that your PPE was suitable for the task?</i>			
I have attached the following as evidence of this activity:			

Inspecting the work site			
<i>Describe the process that you used to inspect the work site.</i>		 Risk assessment Photographs Videos Site plan Documentation in relation to services	
<i>How did you locate services?</i>			
<i>What hazards did you identify and how did you address them?</i>			
<i>What risk controls did you put in place? Did you require signage and barricades?</i>			
I have attached the following as evidence of this activity:			

Task 3			
Activity	Your comments/describe what you did	Suitable evidence	Supervisor's initials
Reviewing work instructions			
<i>Summarise the information that you got from the work instructions, plans and specifications for this task.</i>		 Work instructions Photographs Your notes/plans	
<i>What did the work instructions, plans and specifications for this task tell you about the tools and equipment that you would require for this task?</i>			
<i>How did you use the work instructions, plans and specifications to help you use tools and equipment for this task?</i>			
I have attached the following as evidence of this activity:			

Planning			
Describe the planning which you did to ensure that you complied with legislation, national construction codes, Australian Standards and workplace requirements.		 - Policies - Procedures - Work plans - Work instructions - Photographs	
List at least three sources of information that you used to source information about your requirements in these areas.			
Describe one Australian Standard that you complied with when doing your planning.			
Describe the planning which you did to ensure that you worked safely and complied with WHS standards.			
Describe the planning which you did to ensure that you met environmental requirements.			

<i>Describe the planning that you did to meet workplace requirements.</i>			
I have attached the following as evidence of this activity:			
Personal protective equipment (PPE)			
<i>Describe the process that you to select PPE for this task.</i>		 Work instructions Photographs Videos Supervisor endorsement Policies and procedures	
<i>What PPE did you select for this task?</i>			
<i>What changes did you need to make to PPE depending on the tools or equipment that you were using?</i>			
<i>How did you ensure that your PPE was fitted properly?</i>			
<i>How did you ensure that your PPE was suitable for the task?</i>			
I have attached the following as evidence of this activity:			

Inspecting the work site			
<i>Describe the process that you used to inspect the work site.</i>		 Risk assessment Photographs Videos Site plan Documentation in relation to services	
<i>How did you locate services?</i>			
<i>What hazards did you identify and how did you address them?</i>			
<i>What risk controls did you put in place? Did you require signage and barricades?</i>			
I have attached the following as evidence of this activity:			

Part 2 – Selecting the right tool for the job

For each of the tools and equipment listed below, complete the following table by:

- indicating which task you used each one for
- describing why you selected it for the task (including the functions and operations that made it suitable for the task). You only need to use a few words to describe each tool. For example, power, accuracy, sharpness, level of detail etc.
- describing any limitations to the tool or equipment.

Ask your supervisor to initial each entry. Don't forget to ask them to add their comments and to endorse Part 2 when it is complete.

Hand tools						
	Task 1	Task 2	Task 3	Why did you choose this tool for this task?	Did this tool have any limitations for this task?	Supervisor initials
Retractable tape measure						
Folding or steel ruler						
Combination square						
String line						
Chalk line						
Hand saw						
Trimming knife						
Clamps						
Bevels						

Wood chisel						
Spirit level						
Tin snips						
Power/battery/pneumatic tools and equipment						
	Task 1	Task 2	Task 3	Why did you choose this tool for this task?	Did this tool have any limitations for this task?	Supervisor initials
Circular saw						
Reciprocating saw						
Sliding compound saw						
Jigsaw						
Angle grinder						
Planer						
Laminate trimmer or router						
Drill						
Rotary hammer drill						
Impact driver						
Nail gun						

Bench grinder						
Extension lead						
Portable residual current device						
Air compressor and hoses

Part 3 – Clean up

Describe the clean-up tasks that you undertook for each of the three carpentry tasks by answering all of the questions in the tables below. Complete a separate table for each of the three tasks.

Ask your supervisor to initial each entry. Don't forget to ask them to add their comments and to endorse Part 3 when it is complete.

Task 1			
Activity	Your comments/describe what you did	Suitable evidence	Supervisor's initials
Clean up			
<i>Describe the overall clean-up process.</i>		 Work instructions Photographs Your notes/plans	
<i>How did you ensure that it met safety requirements?</i>			
<i>What legislation did you use and how did you use it?</i>			
<i>What Australian Standards did you use and how did you use them?</i>			
<i>What policies and procedures and how did you use them?</i>			
I have attached the following as evidence of this activity:			

Waste disposal			
<i>How did you dispose of the waste from this task?</i>		 Policies Procedures Work instructions Photographs Videos	
<i>What policies and procedures and how did you use them?</i>			
I have attached the following as evidence of this activity:			
Materials handling			
<i>Describe the materials handling processes that you used during the clean-up for this task.</i>		 Policies Procedures Work instructions Photographs Videos	
<i>What policies and procedures did you refer to and how did you use them?</i>			
<i>How were surplus materials moved, disposed of and stored?</i>			
I have attached the following as evidence of this activity:			

Storing tools			
Describe the process that you used to prepare tools for storage and to store them.		 - Policies - Procedures - Work instructions - Photographs - Videos - Fault reports	
What maintenance did the tools require before they were stored?			
How did you check the tools to see if they required maintenance?			
What policies and procedures and how did you use them?			
I have attached the following as evidence of this activity:			

Task 2			
Activity	Your comments/describe what you did	Suitable evidence	Supervisor's initials
Clean up			
<i>Describe the overall clean-up process.</i>		 Work instructions Photographs Your notes/plans	
<i>How did you ensure that it met safety requirements?</i>			
<i>What legislation did you use and how did you use it?</i>			
<i>What Australian Standards did you use and how did you use them?</i>			
<i>What policies and procedures and how did you use them?</i>
